Narrative:

Describe the ways the proposed project supports Albemarle County’s affordable housing needs.

According to the most recent census data (ACS 2021 5 year estimates, Table S2504), approximately 19% of the County’s housing stock is located within properties containing 5 or more units. The proposed project would help increase the County’s multifamily housing stock, and provide this type of housing in close proximity to neighborhood amenities and employment opportunities.

The applicant proposes to provide 15% of the total residential units (25 units) as affordable housing for a 10-year period if provided as affordable rental housing. If the affordable units are provided for-sale, the affordability period applies to the initial sale only. This is consistent with standard administrative processes in place at the time the application was submitted.

Overall, Albemarle County needs to add approximately 6,946 affordable units to the housing stock by the year 2040 in order to meet current and future affordable housing needs. To meet this goal, the County will need to increase the affordable housing stock by 496 units per year for the next 16years. The affordable units proposed in this project represent approximately 5% of the affordable housing units needed this year.

Project Evaluation:

- This project positively impacts affordable housing needs in Albemarle County
- This project positively impacts workforce housing needs in Albemarle County
- This project has no impact on affordable or workforce housing needs in Albemarle County
- This project has a negative impact on the affordable or workforce housing stock in Albemarle County
