REQUEST OF SPECIAL EXCEPTION TO FRONT STEPBACK

According to Chapter 18, Article II, Section 4.20(a) of the County's Code of Ordinances, conventional commercial districts shall have the following front setback for buildings:

For each story that begins above 40 feet in height or for each story above the third story, whichever is less, the minimum setback shall be 15 feet

This setback requirement helps to break up large building masses and ensure a human scale to streetscapes, where sunlight can reach the street trees and pedestrians do not feel as though the buildings are looming over them. However, in this case, the building is proposed beyond the maximum 30 ft setback in order to avoid existing utilities near Woodbrook Drive. Therefore, the building will not be as close to the sidewalk as the zoning ordinance intended, and the need for a building setback is reduced.

The proposed mixed use building requested with the special use permit is 4 stories, but will not have any stories that begin above 40 feet in height. According to Section 4.20(a)(4), the minimum 15-foot setback may be reduced by special exception. We hereby request to reduce the setback to 0 ft. As mentioned, the building is proposed beyond the maximum setback from the sidewalk at approximately 80 ft away.

Though there are not currently architectural plans for the proposed building, it is intended that there will be some variation in the façade so that it is visually interesting and broken up even though the 4th story may not be stepped back.
