SP202200020 Esmont-Scottsville Transmission Line Rebuild Project Special Use Permit Condition

1. Development must be in general accord, as determined by the Director of Planning and the Zoning Administrator, with the conceptual plan titled "Esmont-Scottsville Transmission Line Rebuild Aerial Mapbook," prepared by Appalachian Power, and dated 7/13/2022. At a minimum, to be in general accord with the conceptual plan:
 - Supporting structures for the electrical transmission lines must remain within the right-of-way shown on the plan.
 - New transmission poles and other permanent structures must be steel structures with a dulled, galvanized finish.

Minor modifications to the plan that do not conflict with the above elements may be made to ensure compliance with the Zoning Ordinance.
