**Narrative:**

*Describe the ways the proposed project supports Albemarle County's affordable housing needs.*

Applicant proposes providing 15% of the total residential units as affordable housing for a total of 31 affordable units. Units would be made affordable to households with incomes at 80% AMI. Applicants has not specified if the affordable units would be provided as rental units or units for sale, so the affordability period cannot be determined but would range from first sale of property to 10 years for affordable rental units. This proffer is consistent with standard administrative practice.

Overall, Albemarle County needs to add approximately 7,019 affordable units to the housing stock by the year 2040 in order to meet current and future affordable housing needs. To meet this goal, the County will need to increase the affordable housing stock by 439 units per year for the next 16 years. The affordable units proposed in this project represent approximately 7% of the affordable housing units needed this year.

**Project Evaluation:**

- This project has a small positive impact affordable housing needs in Albemarle County
- This project positively impacts workforce housing needs in Albemarle County
- This project has no impact on affordable or workforce housing needs in Albemarle County
- This project has a negative impact on the affordable or workforce housing stock in Albemarle County
