

Proposed Allocation of Funding

The \$1.4 million program funds are proposed to be allocated to each Community Advisory Committee sub-area using the following formula which is based on population. Each sub-area begins with \$75,000, then the remaining funds will be divided as a ratio of the share of county population by sub-area.

Population values are based on County 2010 population estimates, using decennial US Census data (the most recent analysis available for these sub-areas).
