Narrative:

Describe the ways the proposed project supports Albemarle County's affordable housing needs.

Applicant proposes constructing a maximum of 410 residential units comprising a mix of townhomes, condominium units, and multifamily apartment units. The applicant proffers providing 15% of the total units as affordable rental housing, for a maximum of 62 affordable units. Rents for the affordable units would be set at 80% AMI which is consistent with standard administrative practice. The affordability period for the units would be 30 years, which is consistent with the recommendations included in *Housing Albemarle*.

Taking into affordable units currently in the development pipeline, Albemarle County needs to add approximately 8,016 affordable units to the housing stock by the year 2040 in order to meet current and future affordable housing needs. To meet this goal, the County will need to increase the affordable housing stock by approximately 501 units per year for the next 16 years. The affordable units proposed in this project represent approximately 12% of the affordable housing units needed this year.

Project Evaluation:

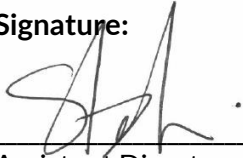

☒ This project has a small positive impact affordable housing needs in Albemarle County

☐ This project positively impacts workforce housing needs in Albemarle County

☐ This project has no impact on affordable or workforce housing needs in Albemarle County

____ This project has a negative impact on the affordable or workforce housing stock in Albemarle County
