Re: Tax Map 63, parcel 19E

Application for a Special Exception to

Chapter 18 of the Albemarle County Zoning Ordinance, Section 4.2 Critical Slopes

Requesting a modification or waiver for the Location and construction of a Single Family Residence.

Attached please find our Application for Special Exception.

On behalf of the Landowner, we request under section 4.2.5, a modification/waiver to section 4.2 critical slopes. Under the ordinance TM63-19E, located on an access easement at the end of Wolf Trap Road, the 55 acre parcel has most of its land consisting of critical slopes and a large portion in two Water protection buffers leaving few options for a building site. Access is limited by topography and easement, and limited suitable sites and soils for a private residential drain field require us to locate a one story single family home in the location selected on the parcel. This parcel existed prior to the critical slope ordinance.

Attached please find our report from the soils engineer regarding the Drain field suitability, an erosion and sediment control plan showing structures protecting the site and providing engineered road access to the building site. All grading activity is well away from any property lines, and implementing the erosion and sediment plan safeguards against any runoff damage. Slopes disturbed follow Soil erosion best management practices. Slopes are to be cut and filled to achieve a level surface for roads, parking, and building. Fill slopes are to be blended with the natural steep hillside. Drive design to follow contours and natural topography as best possible to reach the intended building site.

We ask that you provide relief from the ordinance and grant a waiver for this parcel for purposes of access to the buildable homesite, grading the homesite foundation and building area, private residential drain field as currently designed, and provision for installation of utilities.

Due to the size of the 55 acre parcel, the critical slope crossing and disturbance would not be detrimental to the public health, safety or welfare and is away from adjacent property lines. Well designed access and a professionally designed soil erosion and sediment plan address the site challenges and contribute to the orderly development of the single family homesite.

Due to the property's unusual size, topography, shape, location or other unusual conditions, prohibiting the disturbance of critical slopes will effectively prohibit or unreasonably restrict the use/building of a single family residence on the property for the owners use. On this specific site, with the factors of access, slope/topography, soils, and water protection buffers, in conjunction with the critical slope ordinance-the special exception provision to the ordinance is the specific relief for this parcel and the owner's future home, use and enjoyment of TM63 parcel 19E.

Re: Location of Proposed Sewage Disposal System
Tax Map # 63-19E
Albemarle County, VA

To Whom It May Concern:

I am writing because it is my understanding that the applicants for a building permit for the above-referenced property have had their building application denied due to critical slopes. I have been asked to write this letter by the building contractor, Dobson Homes.

I designed a sewage disposal system (SDS) for the property, and on June 18, 2019, VDH approved the permit. As part of my work for the permit, I measured the slopes where the proposed drainfield is going, and also where the home is proposed, and the slopes did not exceed 25%, although they were very close to that. Therefore, it is my professional opinion that the building site does not exceed critical slope, even though the area may be shown as being in critical slope on the county's GIS system. Furthermore, I would like to point out that the area where the proposed SDS has been approved is really the only area on the property where a drainfield can be approved, in my opinion.

If you have any questions regarding my work, please do not hesitate to give me a call.

Sincerely,

A handwritten signature in blue ink, which appears to read "Thomas G. Hogge". The signature is fluid and cursive, with the first name "Thomas" being the most prominent.

Sewage System

Type of Approval: Applicants for new construction are advised to apply for a certification letter to determine if land is suitable for a sewage system and to apply for a construction permit (valid for 18 months) only when ready to build.

☐ Certification Letter

☒ Construction Permit

☐ Voluntary Upgrade

☐ Repair Permit

Proposed Use:

Single Family Home (Number of Bedrooms 3)

Multi-Family Dwelling (Total Number of Bedrooms _____)

Other (describe) _____

Basement? ☒ Yes ☐ No

Walk-out Basement? ☒ Yes ☐ No

Fixtures in Basement ☐ Yes ☐ No

Conditional permit desired? ☐ Yes ☒ No

If yes, which conditions do you want?

☐ Reduced water flow ☐ Limited Occupancy ☐ Intermittent or seasonal use ☐ Temporary use not to exceed 1 year

Do you wish to apply for a betterment loan eligibility letter? ☐ Yes ☒ No *There is a \$50 fee for determination of eligibility.

Water Supply

Will the water supply be ☐ Public or ☒ Private?

Is the water supply ☐ Existing or ☒ Proposed?

If proposed, is this a replacement well? ☐ Yes ☒ No

If yes, will the old well be abandoned? ☐ Yes ☒ No

Will any buildings within 50' of the proposed well be termite treated? ☐ Yes ☒ No

All Applicants

Is this a private sector OSE/PE application? ☒ Yes ☐ No If yes, is the OSE/PE package attached? ☒ Yes ☐ No

Is this property indeed to serve as your (owners) principal place of residence? ☒ Yes ☐ No

In order for VDH to process your application for a sewage system you must attached a plat of the property and a site sketch. For water supplies, a plat of the property is recommended and a site sketch is required. The site sketch should show your property lines, actual and/or proposed buildings and the desired location of your well and/or sewage system. When the site evaluation is conducted the property lines, building location and the proposed well and sewage sites must be clearly marked and the property sufficiently visible to see the topography.

I give permission to the Virginia Department of Health to enter onto the property described during normal business hours for the purpose of processing this application and to perform quality assurance checks of evaluations and designs certified by a private sector Onsite Soil Evaluator or Professional Engineer as necessary until the sewage disposal system and/or private water supply has been constructed and approved.
