Updated Information:

Okay I have gone back and looked for all of the information that I was keeping. Like I said I was tracking the information more so to support my claim of the difficulty in acquiring dirt for our meeting on 21 Oct and 2 Dec than keeping track of the total numbers.

17 thru 25 September - 11 Loads
26 Sept thru 18 Oct - 16 loads
19 Oct - 22 Oct - 49 loads
23 Oct - 16 Nov - 11 loads

I don't have the information for Thanksgiving Week or the week after. I can say with 100% certainty nothing was delivered the Thursday, Friday, Saturday and Sunday of Thanksgiving Weekend. I am not positive, but I think there was a rain event the first couple of days that week and we do not allow dirt to be delivered if it is Monday (but I am not 100% sure about the rain).

I am wondering if you have any information for the week of 28 Nov thru 2 December. I do know we received dirt that week and you received complaints. I recall you mentioning that you had sent an inspector out on one of the days because of the complaints.

Since our 2 December meeting I have been keeping track of everything.

2 December to present - 2 loads

I can also say with 100% certainty that there has only been one Saturday since the start of this at the beginning of August that dirt was imported and none on any Sunday.

**Subject:** Truck Count

So the information that I can provide at this time is as follows:

From 26 Sept to 18 Oct I received 16 loads
From 23 Oct to 16 Nov I received 11 loads
From 3 Dec to Present I have received 2 loads

There has only been delivery mad on a Saturday one time and never on a Sunday since the project stared at the 1st of Aug.

I was tracking more so to show how difficult it is to get the dirt than to keep total counts to explain why I need time. Now though since the beginning of Dec and in light of the recent accusations I plan on tracking everything.

Hope this helps some. Please let me know if you need something else and as soon as I get the email from the USDA guys I will forward it to you.

Tim
