Narrative:

Describe the ways the proposed project supports Albemarle County's affordable housing need

The applicant proposes to construct up to 122 residential units provided as a mixture of single-family attached units and multifamily units. The applicant also proposes to provide 15% of the total number of units built – or up to 18 units – as affordable housing. Units provided as affordable rental housing would be made available to households with incomes up to 80% AMI, and would remain affordable for a 10-year period. Units provided as affordable units for-sale, would be made available to households with incomes up to 80% AMI, with affordability period applying to the initial sale only. Both affordable housing proposals are consistent with the County's standard administrative processes.

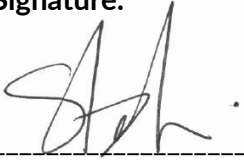

Overall, Albemarle County needs to add approximately 8,518 affordable units to the housing stock by the year 2040 in order to meet current and future affordable housing needs. To meet this goal, the County will need to increase the affordable housing stock by 501 units per year for the next 17 years. The affordable units proposed in this project represent approximately 4% of the affordable housing units needed this year.

Project Evaluation:

- This project positively impacts affordable housing needs in Albemarle County
- This project positively impacts workforce housing needs in Albemarle County
- This project has no impact on affordable or workforce housing needs in Albemarle County

_____ This project has a negative impact on the affordable or workforce housing stock in Albemarle County
