**SP-2016-03 WEST GLEN**  
**Conditions**

1. The culverts under Cling Lane Extended shall be in general accord with the attached drawing titled "Special Use Permit Plans for West Glen Subdivision" (the "Plan") prepared by Dominion Engineering with a revision date of June 3, 2016. To be in general accord with the Plan, development shall reflect the general size, arrangement, and location of the culverts, as well as maintaining no increase of the 100 year flood elevation outside of the West Glen Subdivision property. Modifications to the plan, which do not conflict with the elements above may be approved subject to the review and approval of the County Engineer.
2. Prior to final road plan approval or permitting of a land disturbance in the floodplain, the applicant shall obtain from the Federal Emergency Management Agency (FEMA) a conditional letter of map revision (CLOMR or CLOMA), and prior to road acceptance the applicant shall obtain from FEMA a letter of map revision (LOMR or LOMA). In addition, the applicant shall copy the County Engineer on all correspondence with FEMA. Construction and installation of the culverts shall be in compliance with approved road plans and the FEMA approved CLOMR or CLOMA.
3. Any residential lots and associated streets resulting from the subdivision of the Property, with the exception of the stream crossing and roadway identified on the attached plan as Cling Lane Extended, shall be located outside of the 100 foot stream buffer, Flood Hazard Overlay District and preserved slopes on the Property. Lots may be permitted to be located within the landward 10 feet of the 100 foot stream buffer only if the lots are adjacent to approved stormwater management facilities located within the landward 50 feet of the stream buffer. Approval of lots located within the stream buffer shall be subject Subdivision Agent approval.
4. The net density of the Property shall not exceed 6 units per acre, in accordance with the Crozet Master Plan. Net density shall be calculated by subtracting the area within the Flood Hazard Overlay District, the 100 foot stream buffer, and areas of preserved slopes from the total acreage of the Property.
5. Prior to issuance of a grading permit to allow installation of the stream crossing or with submittal of the final subdivision plat, whichever comes first, the applicant shall submit an easement plat dedicating to the County the area identified for a greenway trail on the Plan.
6. If the construction of the stream crossing for which this Special Use Permit is issued is not commenced by September 14, 2021, the permit shall be deemed abandoned and the authority granted thereunder shall thereupon terminate.
