

ZTA2018-02 Commercial and Industrial Zoned Properties Not Served By Public Water

Affected Properties

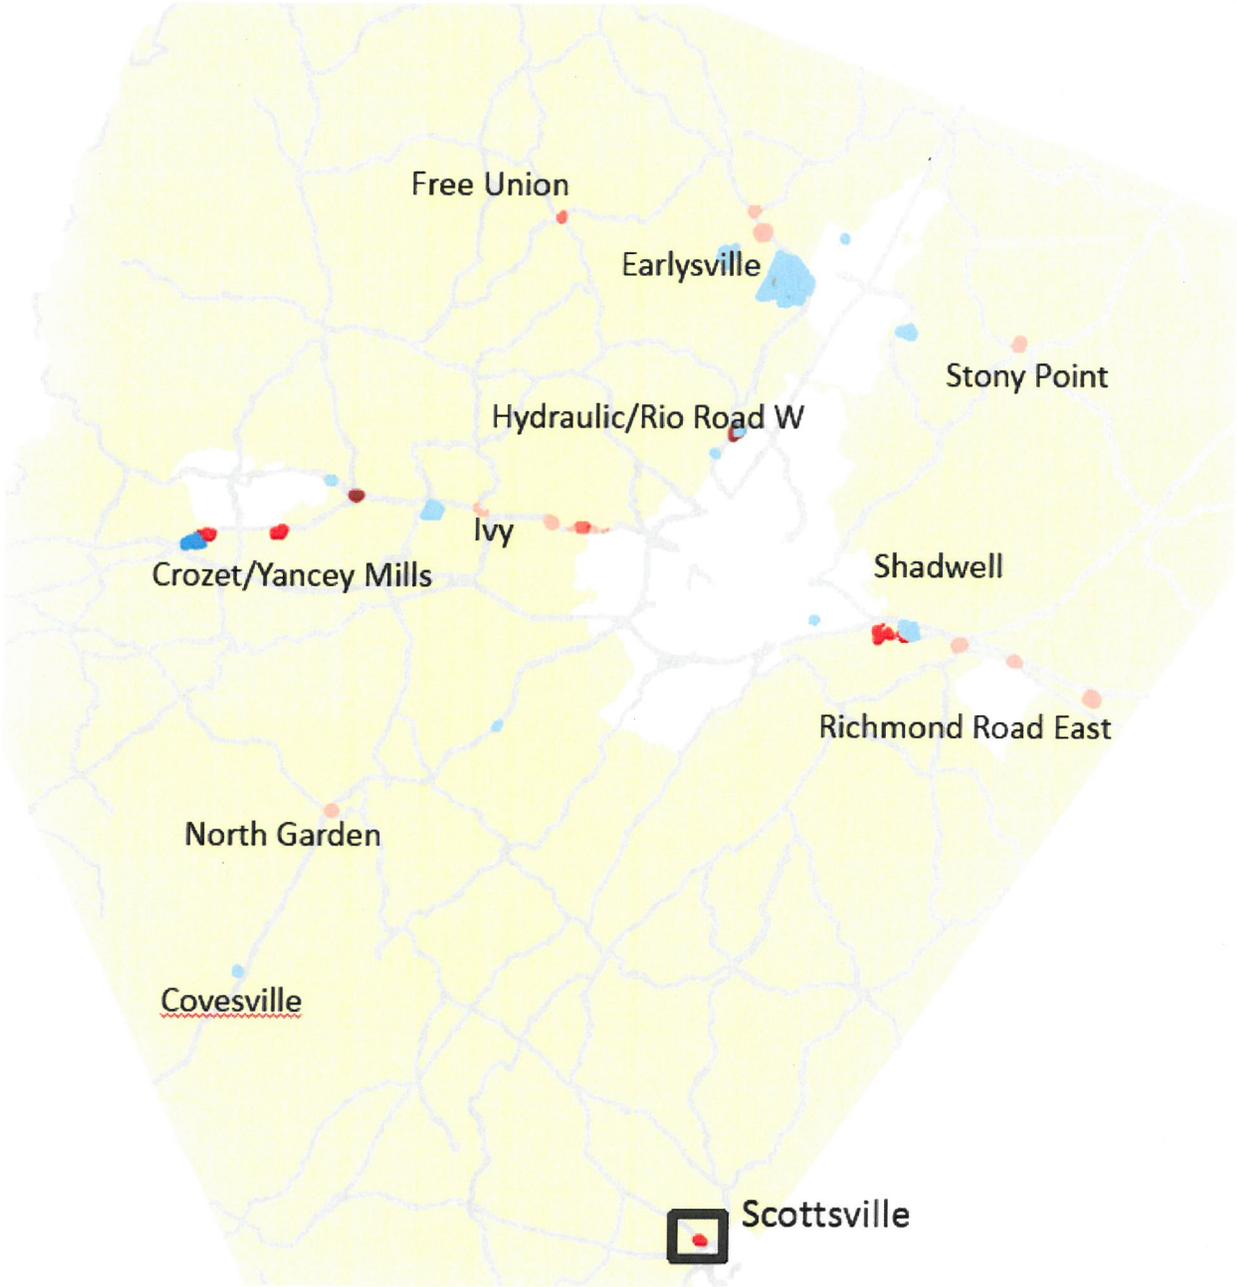

Staff has used GIS to identify properties that will potentially be affected by this zoning text amendment. A review of GIS indicates there are approximately 80 properties zoned Commercial and Industrial that are not designated for public water and sewer service and are located outside the Development Area. Initial estimates by staff indicated approximately 125 parcels would be affected but that estimate included parcels that are designated for public water service. The approximate acreage of parcels affected is 304 acres. These parcels range in size, location, and use. Additional parcel information and maps showing the zoning and ACSAJA designation for affected properties, along with neighboring properties, are provided below.

Parcel size ranges for commercially and industrial zoned properties range from 0.08 to 26.8 acres and the average parcel size is 3.87 acres. Larger parcels affected by these ordinance changes include four LI zoned properties over 20 acres in size, three of which are already developed. Heavy Industrial parcels (HI) will be not affected by proposed ordinance changes as all are designated for public water service.

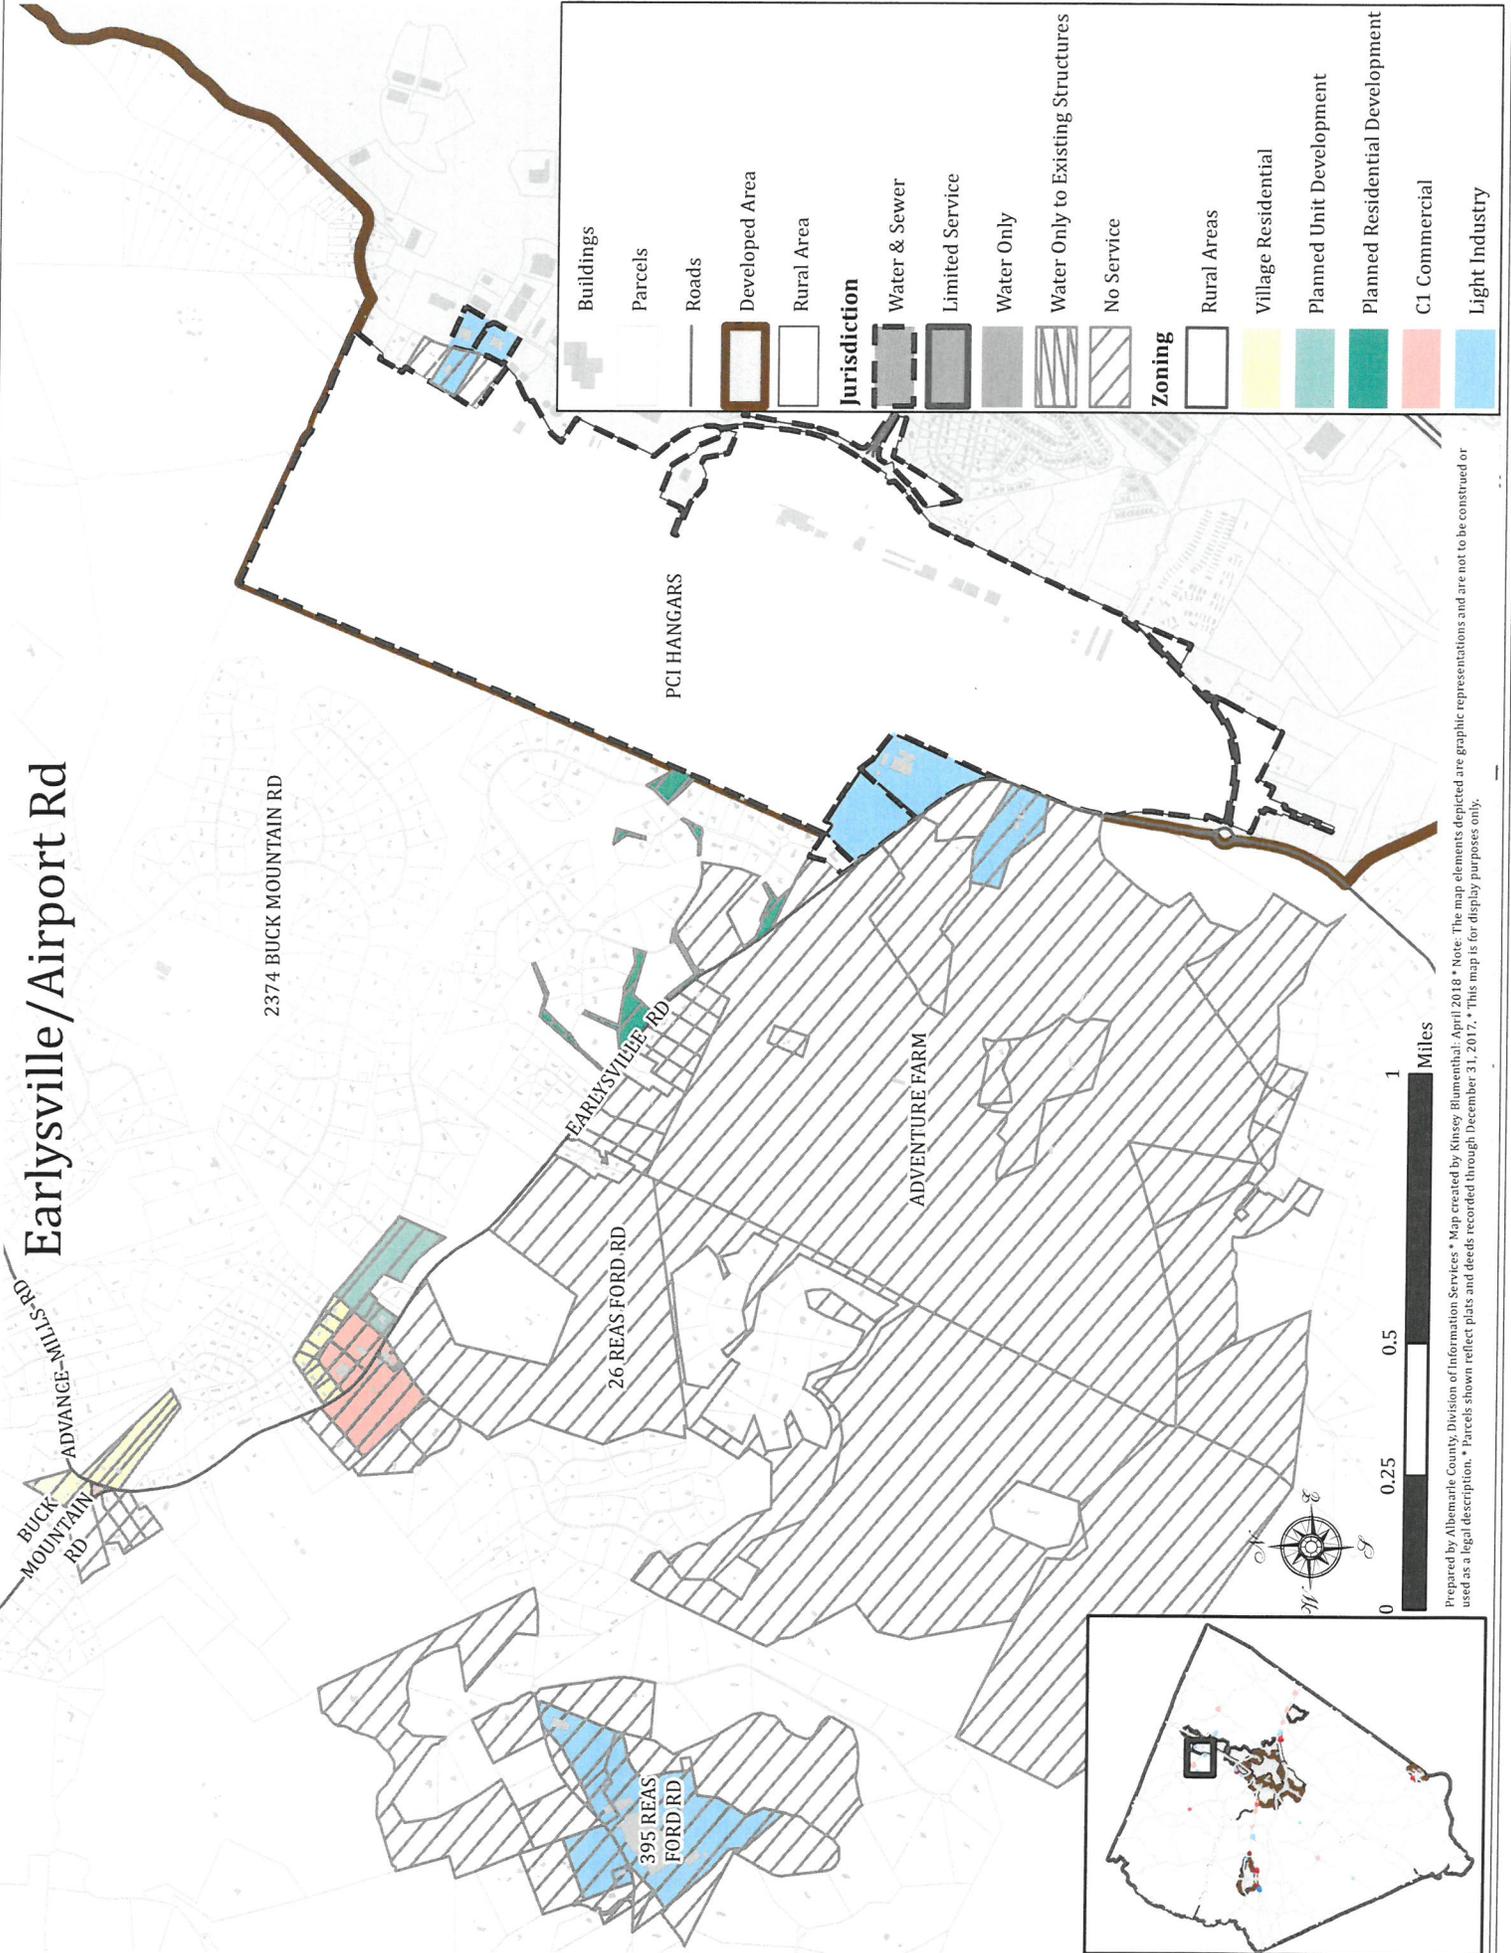

Zoning	Undeveloped Acres	Developed Acres	Total Approx. GIS Acreage
C1 Commercial	15	36	51
CO Commercial	0	16	16
HC Commercial	16	46	62
LI Light Industrial	36	140	176

Affected properties include some that were zoned commercially or industrially and pre-date the County's growth management policy. They do not include any parcels within rural Crossroads Communities. Many properties, but not all, are located in prior County growth areas such as Ivy, North Garden, Stony Point, and Earlysville. Most properties have access to primary roads or in the case of Yancey Mills and Shadwell, nearby interstate access.

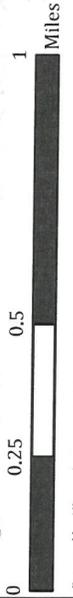

General Location of Parcels Zoned Commercially and Industrially in the Rural Area not Served by Public Water
