## RIO29 SMALL AREA PLAN PARK AND TRAIL PLAN | STUDIO USE ONLY | DRAFT 8/30/18

The Parks & Trails plan proposes to integrate green infrastructure elements throughout Rio29. The plan shows how we can capitalize on existing green features and publicly owned parcels to provide public amenity spaces, increase environmental sustainability through the use of low impact development techniques and stormwater management best practices, and establish a much-desired trail network to enhance access and mobility between public amenities and private attractions. This integrated green infrastructure network will also enhance quality of life, strengthen sense of place, and reflect the County's environmentally-friendly identity.

TYPE A Multi-Use Path

TYPE B Primitive Nature Trail
